Data Source: Maine Integrated Youth Health Survey

Based on respondents' report of the past seven days, includes 100% fruit juice.

All percentages are weighted to be more representative of the population of Maine students and to adjust for non-response.

95% CI = 95% Confidence Interval.

NA = not available. The sample size for the K/3 survey does not allow stratification by public health district. County level data is not available for either 5/6 or K/3

** All racial categories are non-hispanic except for "Hispanic."
